

Sawmill Limited

Gates & Ironmongery

Sawmill Limited

Some years ago, we teamed up with a professional gate maker to enable the business to provide cost effective and quality gates for our customers.

It is our policy to pressure treat the timber gates on site with green Tanalith E which will help increase the lifespan of the gates. The only exception to this being gates which are too large for the treatment tank dimensions.

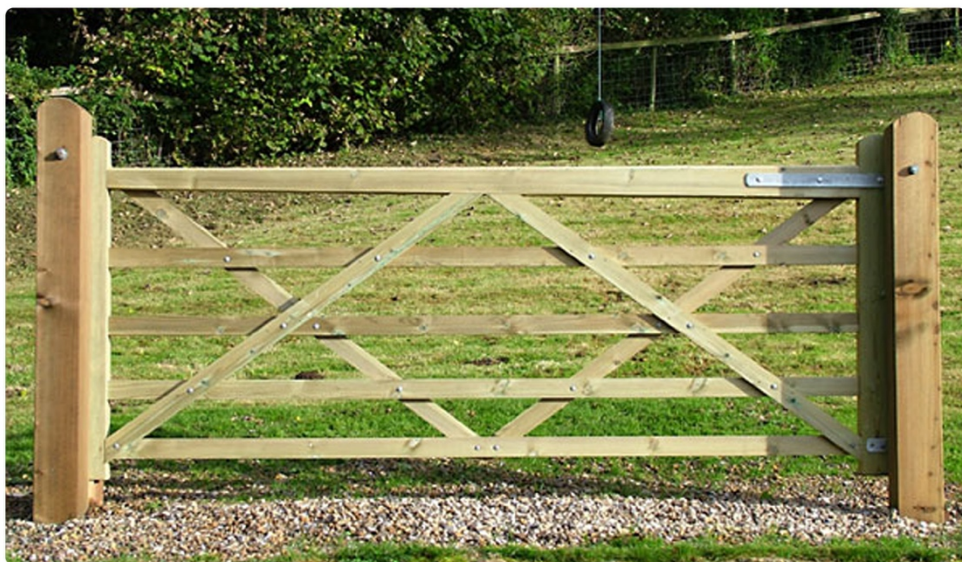

Correct gate operation is very important and relies heavily on accurate measurements. To assist you, general guidance is given in this brochure.

Gates are made to customer requirements and take approximately six weeks from date of order.

Standard 6 Bar Universal Gates & Galvanised Gates are held in stock in a variety of sizes. We also have a range of gates which match our decorative panels.

Gate prices are dependant on type, width and height. For more information please contact us.

DOUBLE or SINGLE GATES HUNG FLUSH ON BACK or FRONT OF GATE POSTS

GATE MEASUREMENT GUIDANCE

Correct gate operation is very important and relies heavily on accurate measurements.

Ironmongery can vary in size depending on the type and manufacturer.

We would stress that for a perfect fit for your gate(s) you need to take measurements with the actual gate fittings you intend to use.

For Example;

Using Ironmongery Set 6 temporarily offer it up to the gate posts to obtain the actual gate width.

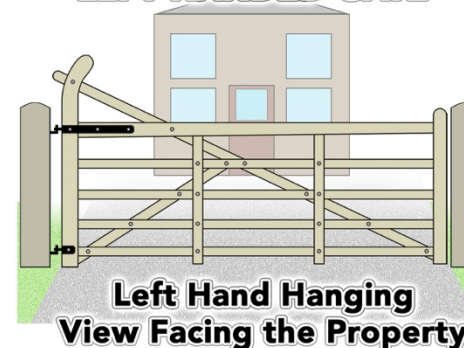

Single Gates are manufactured either left or right handed.

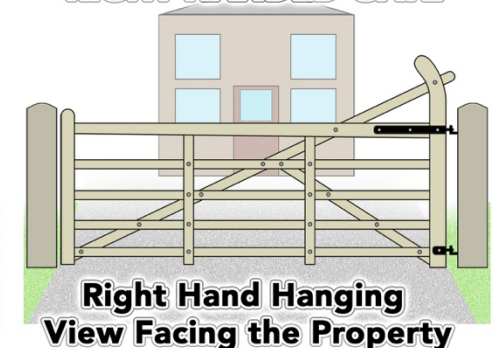

It is normal for the front of the gate to face away from the property.

To assist you we show examples below.

LEFT HANDED GATE

RIGHT HANDED GATE

CONVERSION TABLE

To convert Metres to Feet ÷ 0.3048

To convert MM to Inches ÷ 25.4

To convert Feet to Metres x 0.3048

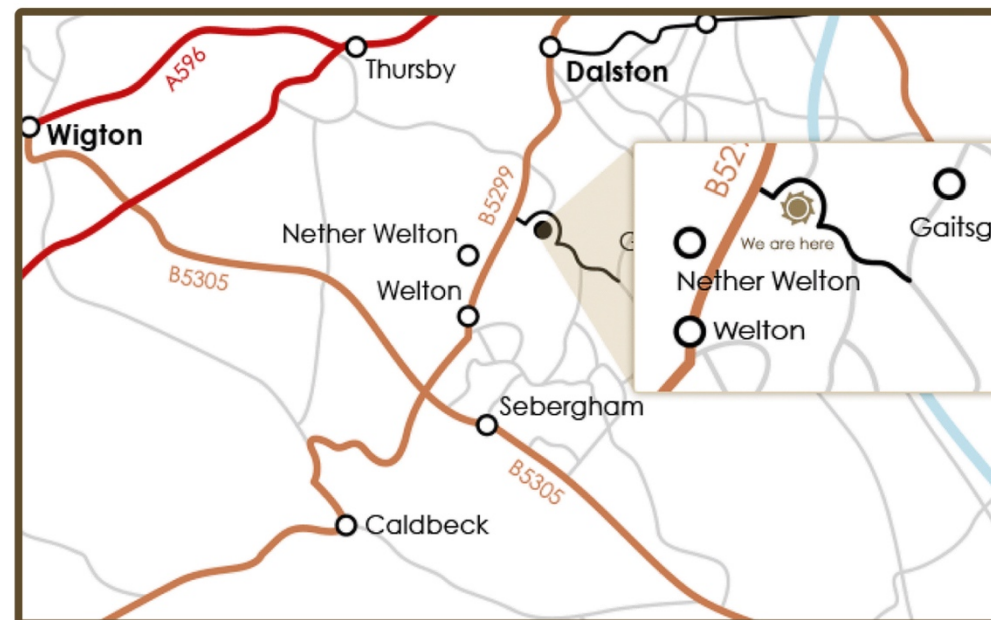

To convert Inches to MM x 25.4

1.5m = approx 5'	actual size (4'11")
1.8m = approx 6'	actual size (5'11")
2.1m = approx 7'	actual size (6'10")
2.4m = approx 8'	actual size (7'10")
2.7m = approx 9'	actual size (8'10")
3.0m = approx 10'	actual size (9'10")
3.6m = approx 12'	actual size (11'10")
4.2m = approx 14'	actual size (13'9")
4.5m = approx 15'	actual size (14'7")
4.8m = approx 16'	actual size (15'9")
5.1m = approx 17'	actual size (16'7")
5.4m = approx 18'	actual size (17'7")

22mm = 7/8"	75mm = 3"
25mm = 1"	100mm = 4"
